# Design Sprint Day 1

**Jane's Scenario, using our website to decide on whether she should travel to see her grandkids:**

Due to Jane's old age, she is at a greater risk of serious health complications if she was to contract the Covid-19 virus. She still wants to be able to see if she can travel to see her grandkids if they are in an area that is not considered a hotspot.

Jane is trying to keep up with the times but she does not know how to use most new applications due to their complexity. She knows how to basic internet functions and basic applications, so she would love a simple design. She also has really bad eyesight so it is important to make sure the website is accessible to her by making the data easy to read.

**User Story:**

As an elderly person, I want to be able to know if it is safe to visit my grandkids during the Covid-19 pandemic.

As an elderly person, I want to be able to easily read the data presented to me.
