

James White

### Sprint Day 1

Scenario: Willie Erbantrout is a 57 year old history teacher at a high school in Miami. He has been teaching students for 30 years of his life and works on woodcarving in his free time. Willie has been diagnosed with type 2 diabetes for 10 years. Due to his condition, Erbantrout is at risk for developing severe symptoms that could threaten his life. He would like to be able to view hot maps of the areas around him so he knows how to stay safe. He would like the information to be easily accessible to him. He would also like to be able to see how rapidly the virus is spreading in his area.

User Story: As an at risk adult for Covid-19, I want to be able to see how Covid is affecting my area and if it's still safe to teach.

As an older person, I would like the website to be easily accessible.
